

Hydraflo® NPK

Fertiliser with Wetting Agent

19+1+2.3

USES:

Hydraflo NPK combines Scotts slow release fertiliser technology with a unique soil wetting agent, in a ready to use dry granular formulation for ease of distribution.

Hydraflo NPK feeds turf for 6-8 weeks while simultaneously preventing formation of dry patch, aiding in the re-wetting of dried soils and also facilitating free drainage from wet areas.

Hydraflo NPK is ideal for renovation or maintenance feeding of greens, sports-turf, landscape situations and utility turf areas.

RECOMMENDED RATE

2.0 to 2.5 kg/100m²

(Bag coverage: 800-1000m²)

PRODUCT CHARACTERISTICS

Particle size 1.7 - 4.0 mm

DIRECTIONS FOR USE:

Apply Hydraflo NPK to wet or dry foliage.

Safe in use, no need to irrigate immediately after application except on bent grass.

Irrigate the treated area with 4-6 mm within 24 hours.

Use only where both fertilization and soil wetting agent is required.

Do not apply when day time temperatures are expected to exceed 32°C.

Reseal bag after use by folding and securing the open end of the packaging, to prevent atmospheric moisture entering the bag.

GUARANTEED ANALYSIS:

	W/W
Total Nitrogen (N)	19%
N as Ammonium	3.7%
N as Urea	8.2%
N as slow release	7.1%
Total Phosphorous (P)	1.0%
P as Water Soluble	0.8%
P as Citrate Soluble	0.2%
Total Potassium (K)	2.3%
Water Soluble Chloride Free	
Total Sulphur (S)	5.6%
Combined elemental Sulphur and Sulphate	
Total Iron (Fe)	1.4%
Fe as Sulphate	
Total Manganese (Mn)	0.7%
Mn as Sulphate	
Hydraflo Wetting Agent	17%

SPREADER SETTINGS

Scotts R8-A / AccuPro 2000

	Low Rate	High Rate
Application Rate	200kg/ha	250kg/ha
Ground Speed	4.5km/hr	4.5km/hr
Width between passes of spreader	1.75m	1.75m
Cone Setting	7	7
Setting	M	M ¹ / ₂

N.B: always apply using a double application technique. The spreaders listed will distribute granules in a 3.5m swathe, which is twice the recommended pass width of 1.75m. Given spreader settings are recommendations only, exact rates, using the settings given in this table, can not be guaranteed, as rates are dependent on the spreader itself and the accuracy of the person operating it. Calibrate the spreader at regular intervals to provide proper distribution.

Trial before change: Before a new rate, product or application method is used, a small trial is recommended.
