DESCRIPTION

Osmocote Mini Controlled Release NPK fertiliser provides a balanced delivery of plant nutrients over the longevity periods indicated. Osmocote Mini is an ideal product for the fertilisation of plug cell systems. The prills are so small that in substrate volumes of about 20cc an even distribution can be obtained. Osmocote Mini is effective in all commonly used substrates and the release of nutrients is not influenced by pH, salt concentration or water quantity.

DO NOT DIBBLE APPLY THIS PRODUCT.
