

Sierraform®

18+10+4

FERTILISER

COMPLETE GREENS FERTILISER

18+10+4

18 % TOTAL NITROGEN (N)

6.4 % as ammoniacal nitrogen

2.7 % as urea nitrogen

8.9 % as methylene ureas

I 3.0 % soluble at 20°C

II 3.0 % insoluble at 20°C / soluble at 100°C

III 2.9 % insoluble at 100°C

9.6 % **PHOSPHORUS (P)** Soluble in neutral ammonium citrate and water.

7.9 % water soluble present as sulphate.

4.1 % POTASSIUM (K)

Slowly soluble as fused potassium

RECOMMENDED RATE:

20 - 25 g/m². Bag coverage: 20 kg for 800 - 1000 m².

DESCRIPTION: Use at high rate as a starter fertiliser for sowing, reseeding or turfing. Readily available phosphorus stimulates root growth. On established turfgrass apply at low rate for enhanced root development at spring green-up, renovation, or to correct phosphorus deficient soils. Apply to dry foliage and water with 5 mm of irrigation. Apply only the light rate if temperatures are expected to exceed 30°C.
