

GENERAL INSTRUCTIONS

Do not apply Sierraron G Herbicide during periods of intense rainfall, when wind speed exceeds 30kmph for ground applications or under conditions, which cause granule movement to non-target areas. On slopes of 20° to 30°, apply Sierraron G Herbicide by broadcast, strip or spot application only. On slopes greater than 30°, apply by spot application method only. DO NOT dispense via dust prone methods. Only use with applicators specifically designed to dispense granular products.

RESISTANT WEED WARNING

Sierraron G Herbicide is a member of the Nitrile group of herbicides. This product has diverse sites for mode of action. For weed resistance management, the product is a Group K herbicide. Some naturally-occurring weed biotypes resistant to the product and other Group K herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by this product or other Group K herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Scotts Australia Pty Ltd accepts no liability for any losses that may result from failure of this product to control resistant weeds.

APPLICATION - Horticultural Situations:

This product provides effective season-long control of many annual grasses and broadleaf weeds in a variety of horticultural situations. Application of the granules to a weed free surface ensures best results by preventing growth before it begins. Young, germinating weeds are killed. Take care to avoid letting granules lodge against buds.

Commercial and Industrial Situations:

Note: This product is an easy to use form of highly active chemical. Simply sprinkle the granules, at the recommended rates evenly over the area to be treated. This product is suitable for the use on driveways, paths and tennis courts where desirable trees are in close proximity.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

DO NOT apply under weather conditions, or from equipment, that may cause product to be placed or moved onto nearby susceptible plants/crops, cropping lands or pastures.

PROTECTION OF LIVESTOCK

DO NOT graze livestock on treated areas.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to fish. DO NOT contaminate dams, rivers or streams with the chemical or used containers.

STORAGE AND DISPOSAL

Store in the closed, original container in a dry, cool, well-ventilated area, out of direct sunlight. Do not dispose of undiluted chemical on-site. Puncture or shred and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

FIRST AID

If poisoning occurs, contact a doctor or Poison Information Centre. Phone 131 126

MATERIAL SAFETY DATA SHEET

Additional information is listed in the Material Safety Data Sheet.

CONDITIONS OF SALE

Scotts Australia Pty Ltd will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply or use of these goods other than responsibility for the merchantable quality of the goods and such responsibilities mandatorily imposed by Statutes applicable to the sale or supply of these goods. To the extent allowed by such Statutes the liability of Scotts Australia Pty Ltd is limited to the replacement of the goods or (at the option of Scotts Australia Pty Ltd) the refund of the price paid and is conditional upon a claim being made in writing and where possible sufficient part of the goods to enable proper examination being returned to Scotts Australia Pty Ltd within thirty days of delivery.

Sierraron® G

PRE-EMERGENT HERBICIDE

ACTIVE CONSTITUENT: 67.5g/kg DICHLOBENIL

GROUP **K** HERBICIDE

For Pre-emergent weed control in established shrubs and trees, in gardens and lawns.
For weed control around commercial and industrial areas and in orchards and vineyards as per the Directions For Use table below.

CONTENTS 5kg

DIRECTIONS FOR USE

- RESTRAINTS:**
- DO NOT apply within 4 weeks of transplanting
 - DO NOT use in glasshouses or enclosed shadehouses
 - DO NOT graze livestock on treated areas
 - DO NOT apply to annual plants

SITUATION	WEEDS CONTROLLED	RATE	CRITICAL COMMENTS
Established shrubs and trees in beds and lawns, including: Acacia, Banksia, Birch, Box, Cedar, Cypress, Eucalyptus, Gardenia, Hakea, Hawthorn, Hazel, Heath, Holly, Lilly Pilly, Magnolia, Pines, Poplar, Rhododendron, Roses, Tea Tree, Willow.	Annual Grasses and Broadleaf weeds	600g/100m ²	Spread the granules evenly over the soil of the area to be treated. Remove existing weeds by hand, desiccation or cultivation. Use higher rate on heavier soils.
		60 - 90 kg per treated hectare (2m x 5km).	
	Orchards, including: Apples, Apricots, Citrus, Peaches, Plums and Vineyards.		Apply late winter to early spring before growth has started.
Blackcurrants, Raspberries, Gooseberries. (Tas only)			
Commercial & Industrial Areas	Annual Weeds	180 - 250g per 10m ²	Treatment prior to germination of the weeds will provide long lasting effect. Satisfactory result will be obtained if large weeds are chipped out, if treatment of seedling weeds is necessary. Use higher rate for heavier weed infestations.
	Perennial Weeds	250 - 370g per 10m ²	Treatment should be carried out when plants are dormant - usually in the colder months. Spot treatment of older or more established weeds. Use higher rate for heavier weed infestations.

**NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER,
CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**
WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED.

Sierraron® G Applicator

USING THE HAND APPLICATOR PACK

Hold container so that granules fall vertically onto the spray plate.

To check correct dose apply a known weight of granules over a small area

HOW TO ASSEMBLE APPLICATOR

1. Unscrew cap and remove sleeve before use to reveal applicator parts.

2. Remove inner tube (with orange end) temporarily. Locate outer tube onto cap and screw down locking ring.

3. FOR SELECTIVE WEEDKILLING

insert inner tube with orange end nearest bottle. Then attach spreader plate. Replace cap after use.

4. FOR TOTAL WEEDKILLING

omit inner tube with orange end. Then attach spreader plate. Replace cap after use.
