RECOMMENDED RATE

1.5 to 2.5kg/100m²
Bag coverage: 20kg for 800 - 1,330m²

PRODUCT CHARACTERISTICS

Particle size 0.7 - 2.0mm

DIRECTIONS FOR USE: Apply only to actively growing turf whenever quick greening or additional iron are desired. At the normal rate, apply to wet or dry foliage and water in after application to avoid possible staining and foot printing. For cool season grasses apply only at the light rate when temperature is expected to exceed 30°C and water in after application. For warm season grasses the heavy rate can be used in early spring to help bring grasses out of dormancy. Not recommended for use on newly planted turf grass.
