Hydraflo[®] 2

Granular Wetting Agent

20kg Granular Wetting Agent

Hydraflo® 2

Granular Wetting Agent

For general Nursery, Turf and Landscape use

Hydraflo® 2 is a granular wetting agent that effectively decreases water surface tension. This action aids in the rewetting of dried soils and allows free drainage from water-logged soils. This granular formulation features immediate action as a topdress application or incorporated and improved efficacy over an extended period. Hydraflo 2 is made in Australia for Australasian conditions.

Nursery Potting Mixes

Hydraflo 2 is ideal for use as an additive to nursery potting mixes including peat and pine bark.

Key features and benefits

Feature	Benefits
Granular product	Easy to apply as a topdress or to incorporate in soil mix
Complete formula	No mixing required, minimises risk of application mistakes Safe for use in any season *Dual action formula for immediate and long term effect. Effective for up to 10 months in nursery potting soils when used as directed
Improved active ingredient	Improves soil drainage Greater efficiency of irrigation Prevents dry spots Encourages deeper, stronger roots Inhibits the growth of moss, algae & soil borne pathogens Can increase water retention without decreasing air filled porosity Improves efficiency of soil fungicides and fertilisers Improves Cation Exchange Capacity (CEC) of soilless potting mixes Low rate of use significantly reduces cost per m ³

Rates of application

Situation	Application rate
General nursery and greenhouse potting mixes	Incorporate 1kg/m ³ of mix
Propagation and plug mixes	Incorporate 300g/m ³ of mix

Guaranteed Analysis

Blended Non-Ionic Surfactants	15%
Inert Carrier	85%

TRIAL BEFORE CHANGE: Before a new rate or application method is used, a small trial is recommended.

STORAGE AND USE: Store in a dry, clean place. Reseal open bag by folding down and securing. Use only clean, dry spreaders. Do not leave unused product in spreaders.
