

Scotts Landscaper PRO

Provides turf and ornamental plants with the steady nutrition they need for vigorous, even growth, beautiful colour and optimum health throughout the season

The Scotts Landscaper PRO Range consists of two Lawn Builder products – Regular and New Lawns & Repairs, along with Osmocote All Garden Fertiliser and Hydraflo 2 Soil Wetting Agent.

Lawn Builder covers all applications from establishing new lawns to maintaining and repairing existing ones.

Osmocote All Garden Fertiliser is a multi-purpose controlled release fertiliser for planting out trees, shrubs and bedding plants.

Hydraflo 2 is a concentrated soil wetting agent that helps water and nutrients to penetrate deeply.

The new range has been prepared after consultation with the landscaping industry and provides the professional products required to cover a variety of landscaping situations.

Lawn Builder™ Regular 8kg & 20kg

FEED & FORGET – NO NEED TO WATER IN

- Thicker, greener lawns
- One application provides season long healthier and greener lawns
- Build lawns from the roots up to crowd out weeds
- Feeds continuously without surge growth
- Safer for the environment, minimal leaching

Lawn Builder™ New Lawns & Repairs 8kg

FEED & FORGET – STARTER FORMULA

- Scotts special formula for encouraging regrowth and establishing lawns from seed to turf
- Buffered Nitrogen won't harm tender young grass plants or new turf
- Ideal Phosphorus levels to encourage strong root development

Osmocote® All Garden Fertiliser 10kg

CONTROLLED RELEASE FERTILISER, FEEDING FOR 6 MONTHS

- Multi-purpose fertiliser for planting out of trees, shrubs and bedding plants
- Maintenance of garden beds and potted plants
- Low phosphorus – suitable for Australian natives
- Added Iron (Fe) for good leaf colour
- Safer for the environment, minimal leaching

Hydraflo® 2 Soil Wetting Agent 8kg

CONCENTRATED FORMULA

- Low application rates
- Hydraflo®2 helps water and nutrients to penetrate deeply
- Reduces water run-off
- Increases water retention without decreasing air filled porosity
- Facilitates drainage from wet areas
- Promotes deeper root growth so that less water is needed
- Safe for use on all ornamental plants including turfgrasses
